

Currents

Swim against the tide from the ocean depths to the safety of the shore! Starting at the ocean (arrow) and moving toward the shore (star), roll two six-sided dice. Move to any connected adjacent space with a number you rolled. If two adjacent numbers are simultaneously rolled, choose one and use it first. Then, if you can still move with the second die, do so! Doubles are wild - move once to any adjacent space. The star space is also wild and can be accessed with any roll.
